ADVANTAGES FOR COMPARING TO COMMON CABLE TIES

- 1). **Material:** The material we used is 100% new PA66. Our cable ties are RoHS compliance.
- 2). **Tensile strength.** Tensile strength of our cable tie with 4.5mm width can reach more than 25 kgs even 30 kgs which surpass international standard.
Tensile strength for common cable tie of 4.8mm can only be 22Kgs.
- 3). The total length of our cable ties is 12,000mm. However, there's not so long cable ties on the market.
- 4). Our cable ties can be cut at any length you want. And it's not wasted and cost-saving.
However, common cable tie on market must cut the additional tail when using, which is thriftless.
- 5). The bundling diameter range for our cable tie is huge which can be 3 to 3700mm.
- 6). Usage for our cable tie bundler is wide. It is usully used for field of Garbage bags, Gardening, Luggage, Shipping, Storage, Automotive, Tools, Electrical, Crafts, Security, Camping, Biking, and etc.
